

Serge Ferrari

Soltis
Harmony 88

The ideal compromise
for better comfort

Indoor use:

Roller shades, skylight shades, sliding panels

Outdoor use:

Exterior roller shades, skylight shades

■ **Perfect balance**

Soltis Harmony 88 provides the ideal openness factor to fully enjoy outdoor views while blocking up to 93% of solar contributions.

■ **Design and style**

An even weave pattern, a unique textured appearance and a range of 17 colors to coordinate with your interior.

■ **Long-lasting and sustainable**

The Précontraint technology gives our materials an exceptionally long life. They are 100% recyclable at the end of their service life thanks to the Taxyloop process. Soltis Harmony 88 helps maintain good indoor air quality, as proven by its Greencard Gold certification.

The right balance
so you can enjoy only
the best of the sun

■ Exclusive Précontraint® technology

Patented worldwide, the Précontraint® Serge Ferrari technology involves keeping the composite under tension throughout the manufacturing cycle. It gives our materials exceptional performance that enable them to surpass market standards in terms of dimensional stability, mechanical strength, coating thickness and flatness.

High-tenacity polyester micro-yarn base cloth	①	Superior elongation and tear resistance
A coating with fabrics under bi-axial constant tension in both warp and weft directions	②	No deformation during processing and use
Greater coating at the top of the yarns and a dirt resistant surface treatment	③	Superior aesthetic and mechanical durability
Exceptional flatness and thinness	④	Smooth finish easy to clean, space saving, easy rolling

■ Solar and light properties (EN 14501)

TS: Solar Transmission (%)
RS: Solar Reflection (%)
AS: Solar Absorption (%)
TS + RS + AS = 100% of incident energy
TV n-h: Normal-hemispherical visible light transmission (%)
TV n-n: Normal-normal visible light transmission (%)
g_{tot}^e : External solar factor
g_{tot}^i : Internal solar factor

*Simplified method EN 13363-1

The transmission and reflection values above are based on the integrated values of the glass combined with the screen. These are used to calculate the g_{tot} value. Type "C" glazing is double glazing and insulated with low emissivity in position 3 (4 + 16 + 4; Argon-filled) $g = 0.59 - U = 1.2$.

**Detailed method EN 13363-2

The transmission and reflection values above are based on the integrated values of the glass combined with the screen. These are used to calculate the g_{tot} value. Type "D" glazing is double glazing and insulated with low emissivity in position 2 (4 + 16 + 4; Argon-filled) $g = 0.32 - U = 1.1$.
